

Position Description

ELEARNING INSTRUCTIONAL DEVELOPER

If you are an experienced technical instructional developer who is comfortable using both the left and right hemispheres of your brain – Alhaphort is seeking a key person to join our creative, action-oriented team creating e-learning in an exciting environment for our Federal Government client. Your ability to comprehend technical content, communicate with technical experts and translate technical information into understandable, engaging learning is a must. That, plus your creativity and innovative ideas in designing training content for eLearning programs, will identify you as the successful candidate.

Duties/Responsibilities

In this position, you will use your skills in instructional systems design (ISD) to plan, design and develop content and monitor the production of technically-oriented instructional learning projects to be delivered via our client's LMS. Design projects will include web-based, self-study, virtual training and occasional live classroom training.

- Design eLearning training module content (Our multimedia production team creates the course)
- Create job aids and tools/resources (online, print or other) that supplement training
- Write and create WBT course designs and materials to pass on to multimedia/programming
- Partner with multimedia/programming to manage project scope, expectations, timelines, and deliverables.

Qualifications:

You must demonstrate the ability to communicate effectively in visual, oral, and written form and work both in teams and independently, manage multiple projects, juggle multiple changing priorities, demonstrate high attention to detail, and meet deadlines in working with SMEs, clients and team members.

- Experience designing and developing a variety of delivery formats including classroom, eLearning and webinar systems is required.
- Bachelors degree or equivalent is required; Masters degree is preferred; formal education in Adult Education or Instructional Design is preferred
- Experience developing training using the ADDIE design model (or similar model) is preferred.
- Proven ability to develop training that incorporates adult learning theories, visual learning design and interactive training techniques is preferred
- Strong oral/written communication and editing skills, ability to communicate concrete and abstract ideas and ability to accurately and clearly present new information are required

Per contract requirements, compensation is based on education and experience. This is a full-time, length-of-contract position that is currently funded through November 30, 2016.

To apply, please forward your resume to pmossbruger@alpha-port.com and reference eLearning Instructional Developer in the subject line.
