Alhaporl Relocates its Business Into an Area of Cleveland Targeted for Technology Innovation

CLEVELAND, OH – November 27, 2007 – Alhaporl® a Cleveland, Ohio-based provider of advanced engineering services and applied technology has relocated its business into a government-classified HUBZone of Cleveland to help create high technology jobs in a “Historically Underutilized Business Zone” (HUBZone). Alhaporl is a technology business, founded in 1999, that provides research, development and knowledge management services to the aerospace industry and government organizations.

Alhaporl’s new address at 18013 Cleveland Parkway Drive, Suite 170 is located near the NASA Glenn Research Center. The company recently moved there from its previous HUBZone location on Fleet Avenue in Cleveland.

“Alhaporl was founded in Cleveland and we are demonstrating our commitment to this area by investing in office facilities that will keep us here for a long time,” says Rosella Miranda, CEO. “Our work with space related government contracts is growing rapidly and we expect to create many new technology jobs for Cleveland in the years ahead.”

About Alhaporl

Alhaporl is a certified woman-owned, HUBZone technology business that provides a full spectrum of engineering and knowledge management services for technical organizations. Alhaporl has a rapidly growing team of experienced research scientists, engineers and project managers, many of whom are semi-retired from NASA facilities across the country.

Alhaporl provides the technical expertise for space system services that include design, analysis and development of technologies such as power and propulsion, nuclear engineering, launch vehicles, and space communications. Other areas of expertise include emerging technology development, six sigma process improvement, professional development training, safety, systems engineering, risk assessment, quality assurance, and turnkey knowledge retention programs.

Alphaport has received multiple awards, including NASA's Agency Wide Certificate of Excellence Award and NASA Headquarters' Best Practice Award.
