FOR IMMEDIATE RELEASE

Alhaporl Names Daniel Owens Chief Technology Officer

Cleveland, OH December 9, 2010—Alhaporl, Incorporated, a Cleveland-based provider of engineering services, applied technology, knowledge management and professional development services, recently named Daniel Owens as Chief Technology Officer.

Owens, who previously worked for Alhaporl part-time, was promoted in October to Alhaporl's full-time Chief Technology Officer (CTO). As CTO, Owens serves as the expert on technology, software, and information systems for Alhaporl's top-level planning and development. He is responsible for implementation and administration of technology within the company, which includes providing oversight for all software development, network security, and Internet operations.

Owens is a seasoned technical expert having led Information Technology initiatives over the past ten years for some notable organizations such as the Department of Defense, News Corp, Booz Allen Hamilton, Microsoft, Cisco Systems, Xerox, and the National Institute of Standards and Technology.

"We're fortunate to have Dan on board," said Anthony Miranda, Alhaporl President and Chief Operating Officer. "Dan has a strong track record for bringing about solid results. We know he'll be effective in managing the technological direction of our company in support of our business goals."

About Alhaporl

Headquartered in Cleveland, Ohio, Alhaporl, Incorporated is an engineering services company providing advanced solutions for aerospace, defense, and commercial applications to government and private institutes. Alhaporl specializes in offering comprehensive Knowledge Management services and methodology to help aerospace-oriented organizations to capture, retain, and apply intellectual property for technological innovation and professional workforce development. Alhaporl additionally offers its government and commercial clients advanced engineering and management of multi-faceted product development programs.

Established in 1999, Alphaport's strong performance history has been built on a solid foundation of program and project managers, retired aerospace experts, exceptional engineers and technical specialists serving NASA, the Department of Defense, and private industry on a global scale.

With roots in the transfer of experiential knowledge, Alphaport continues to engage in educational outreach through student internships, academic competition sponsorship, and active recruitment.
