FOR IMMEDIATE RELEASE

Alphaport Celebrates Space Shuttle Discovery's Final Journey

Cleveland, OH October 20, 2010—Alphaport, Incorporated, a Cleveland-based provider of knowledge management and professional development services, engineering services, and product development, will sponsor a pre-launch reception, "Tribute to Discovery," on October 31, 2010 to honor NASA's space shuttle Discovery and its final trip to space. Discovery is scheduled to fly the second to last shuttle mission on November 1, 2010 at 4:40 p.m. EDT, launched from John F. Kennedy Space Center (KSC) in Florida.

Alphaport and co-host Triune Group are sponsoring the event on behalf of the NASA John H. Glenn Research Center, Cleveland, OH, and have distributed 300 invitations. Glenn Center Director Ray Lugo and guests along with Alphaport and Triune employees and their families are expected to attend. Most will watch Discovery's launch on the day following the reception from prime viewing areas at KSC.

The reception will be held on the grounds of the Doubletree Hotel Cocoa Beach Oceanfront, a short drive from KSC, from 6 to 8 p.m. EDT. Partygoers can enjoy festivities, appetizers, and refreshments from the deluxe party tent with surround seating and a dance floor. Well-known performer Johnny Danger, the One-Man Band, will entertain the crowd. Crew members of filmmaker George Lucas' Skywalker Ranch should pump up the fun.

The "Tribute to Discovery" will depict the lead orbiter's history of flight over the last 26 years with 38 flights to its credit. All event attendees will receive drawstring backpacks full of goodies and can pose for a digitally generated picture of themselves "in space" printed as a take home memento. There will be tricks and treats for the kids and nostalgia for the grownups as NASA's space shuttle program comes to an end.

About Alphaport

Alphaport, Inc. is an engineering services company providing strategies, products, and solutions for aerospace, space, defense, and commercial applications to government and technical businesses. Alphaport specializes in offering comprehensive Knowledge Management services and methodology to help aerospace-oriented organizations to capture, retain, and apply its intellectual property for technology innovation or professional workforce development. In addition, Alphaport offers to both government and commercial clients advanced engineering consultancy and management of multi-faceted product development programs.

Alphaport has a rapidly growing team of experienced research scientists, engineers and project managers focused on applying their knowledge to the development of innovative technologies. The company provides technical expertise for commercial space systems to aerospace and government organizations with specialization in power propulsion, communications, and emerging space technologies.

Alphaport has received multiple business and technology awards including an *Inc.* 500 Award for America's fastest growing private companies.
